

## SNAKE BUBBLES

Suitable for age 30 - 60 months

### ***You will need:***

- Plastic water bottle
- Socks
- Bowl of shallow water
- Soap/washing up liquid

### ***What to do:***

1. Pour water onto a plate or bowl, use enough to cover the surface.
2. Add washing up liquid.
3. Use a pair of scissors to cut off the bottom of the bottle.
4. Stretch out the sock and slide it over the bottom of the cut bottle, once the bottling is inside the sock, fold the sock back on its self so you have easy access to the top of the bottle.
5. Dip the end of the bottle and sock into the bubble mixture.
6. Then blow; the harder you blow the longer the snake, little blows will release balls of bubbles.

This activity is very simple, yet has a wonderful outcome. The quick reaction of hundreds of tiny bubbles forming together creates a snake structure which children can quickly recognise as their own doing through cause and effect.

Activity extension - add food colouring onto the end of the sock in order to create a rainbow effect.
